🔗 Portfolio   GitHub   in LinkedIn

OBJECTIVES

Aspiring software developer with proficiency in C, Python, Java, Web Development, Git/GitHub, ReactJS, and Excel. Leveraging hands-on experience from college projects to deliver innovative solutions and enhance organizational productivity. Eager to contribute to a dynamic team, grow in the field of technology, and drive impactful results through expertise in coding, front-end development, and collaborative problem-solving

PROJECTS

Ai - Proctoring System   2025 – present
- Developed an AI-driven online examination proctoring system integrating Azure Computer Vision for real-time face verification, multiple people detection, and object recognition, ensuring secure and scalable remote assessments.
- Implemented advanced fraud detection mechanisms using voice analysis, multi-tab monitoring, full-screen enforcement and browser dev tool restriction, enhancing exam integrity through cloud-based automation.

Railway-reservation-system   2023 – 2024
- Developed a full-stack Railway Reservation System using Java (Spring Boot) and MySQL, enabling seamless ticket booking, seat selection and real-time train status tracking.
- Designed a responsive front-end with HTML, CSS and JavaScript, ensuring a user-friendly interface for efficient ticket management.
